

Harlequin Replacement PCB for Spectrum Computers

I am now offering a new service to Sinclair Spectrum and Spectrum Plus owners who wish to update their machines with the Harlequin board (a compatible Spectrum clone board without the ULA and with modern components). Boards can be purchased from multiple sources, but for those who don't feel confident enough with their soldering skill (there are a LOT of solder joints to make!), I can offer a fully built board using new parts (excluding ROM).

My price includes a new board plus all new parts. You will need to remove the ROM from your original Spectrum board or I can supply a replacement ROM (Standard Sinclair or GW ROM as you prefer) at an extra cost. I can also supply individual components for those who want to make up their own board.

Harlequin 48k Board fitted with all parts except ROM. Output via RCA composite video or 8-pin Mini DIN RGB Video	£139.00
Harlequin 48k Board installed in case. You will need to send your original Spectrum and I will use the case and ROM. A new power supply, cables, etc. will be included, as well as a new keyboard membrane.	£225.00
Harlequin 48k Board installed in new case (Black or White) together with cables, power supply etc. Original Spectrum ROM or GW ROM also included.	£265.00
Harlequin 128k Board	Coming Soon
